

Environmental Policy

We are committed to minimising the impact of its activities on the environment.

The key points of our strategy to achieve this are:

- Minimise waste by operating a 'paperless office' as far as possible and doing business through electronic media.
- Minimise energy use through the purchase and use of low energy appliances and working practices to turn off unused equipment.
- Minimise travel through telephone conference. Where travel is necessary use public transport where feasible.
- Minimise water use through the use of water efficient appliances where possible.
- Actively promote recycling both internally and amongst our customers.
- Source office products that minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.

Responsibility for reviewing this commitment is with the Principal Partner.
